DETAILED ACTION

1. The following is a Final Office Action in response to the communication filed by Applicant on 15 November 2006. Claims 1-34 are currently pending in the application. Claims 33 and 34 were added.

Response to Amendment

2. Applicant's argument regarding:

(1) "a hierarchy of nodes or database locations that enable content providers to publish content by uploading the content to specified one of the nodes"

of claims 1, 31 and 32 have been considered but found not persuasive.

3. Claims 1-32 were previously rejected under 35 U.S.C. 102(b) as being anticipated by Mahoney et al (US Patent No. 5,819,271).

4. Issue no. (1): Applicant's argue: Mahoney does not teach a hierarchy of nodes or database locations that enable content providers to publish content by uploading the content to specified one of the nodes.

Response: The Examiner is entitled to give the claim limitations their broadest reasonable interpretation in light of the Specification (see below):

Claim Interpretation; Broadest Reasonable Interpretation:
<CLAIMS MUST BE GIVEN THEIR BROADEST
REASONABLE INTERPRETATION

During patent examination, the pending claims must be "given the broadest reasonable interpretation consistent with the specification." Applicant always has the opportunity to amend the claims during prosecution and broad interpretation by the examiner reduces the possibility that the claim, once issued, will be interpreted more broadly than is justified. *In re Prater, 162 USPQ 541, 550-51 (CCPA 1969).>*

5. Mahoney discloses a hierarchy of nodes or database locations that enable content providers to publish content by uploading the content to specified one of the nodes. Applicant's specification at page 2 describes the hierarchy: "***a hierarchy of nodes is created according to subject area and other criteria.***" Mahoney describes the information (or content) as corporate information and includes information such as annual reports, quarterly reports, SEC filings and press releases, etc (col. 3, line 50+). This information is linked to other information in other formats, e.g. spreadsheets... audio files... etc (col. 4, line 21+). Thus, setting up a hierarchy of corporation information.

6. The information is then uploaded by the company to the repository server, which is coupled to a plurality of databases of information (col. 6, line 12+). The company contributor fills out a form regarding the information and describes what type of information is being uploaded (col. 9, line 9+). The information is then placed in the corresponding database for viewing (col. 10, line 49+). Thus, the information is

published by the company contributor by "*uploading the content to specified one of the nodes.*"

7. Conclusion: Mahoney discloses a hierarchy of nodes or database locations that enable content providers to publish content by uploading the content to specified one of the nodes. Under their broadest reasonable interpretation in light of the Specification, the claims are taught and no inventive concept is found. Applicant's are respectfully requested to point out to the Examiner which claim limitations in the claims are considered to be the inventive concept because the inventive concept can not be determined from the claim limitations as written.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 33 and 34 are rejected under 35 U.S.C. 102(b) as being anticipated by Mahoney. In reference to claim 33 and 34, Mahoney discloses a method, system and apparatus for publishing content comprising:

a. defining a hierarchy of nodes in a database (col. 3, line 50; col. 4, line 21);

b. one or more of the nodes in the defined hierarchy including topic nodes arranged by topic; receiving content uploaded to specified ones of the nodes by one or more content providers for publication; and displaying the uploaded content (col. 6, line 12+; col. 9, line 9+; col. 10, line 49+).
